# Woore Primary and Nursery School

## Art Policy

### Introduction

Art and design stimulates creativity and imagination. It provides visual, tactile and sensory experiences and a special way of understanding and responding to the world. It enables children to communicate what they see, feel and think through the use of colour, texture, form, pattern and different materials and processes. Children become involved in shaping their environments through art and design activities. They learn to make informed judgements and aesthetic and practical decisions. They explore ideas and meanings through the work of artists, makers and designers. Through learning about the roles and functions of art, they can explore the impact it has had on contemporary life and that of different times and cultures. The appreciation and enjoyment of the visual arts enriches all our lives.

### Our Aims

These aims are intended for all children in school. How they are implemented will depend upon the age and ability of the children.

- To provide children with opportunities to express themselves confidently in emotional terms through their art experiences.
- To provide children with the opportunity to have an enriched experience of the visual and tactile world in which they live.
- To ensure the children learn a range of pertinent skills so that they develop an expertise in using both materials and equipment, therefore enabling the realisation of their ideas.
- To develop the children's patience and persistence to realise their ideas and to recognise the possibility of making mistakes without the feeling of a sense of failure.
- To develop an understanding of the work of artists, makers and designers from their own and other cultures and to apply this knowledge to their own work.
- To develop the children's capabilities in ICT by working with digital art forms.
- To involve children in learning an artistic visual vocabulary so that their expertise in the application of visual perception and in communicating visually is increased.

## **Teaching and Learning**

The school uses a variety of teaching and learning styles in art and design lessons. Our principal aim is to develop the children's knowledge, skills and understanding in art and design. We ensure that the act of investigating and making something includes exploring and developing ideas, and evaluating and developing work. We do this best through a mixture of whole-class teaching and individual/group activities. Teachers draw attention to good examples of individual performance as models for the other children. They encourage children to evaluate their own ideas and methods, and the work of others, and say what they think and feel about them. We give children the opportunity within lessons to work on their own and collaborate with others, on projects in two and three dimensions and on different scales. Children also have the opportunity to use a wide range of materials and resources, including ICT.

Our school uses the Access Art curriculum which provides a broad curriculum from the Early Years Foundation Stage to KS2. The curriculum is highlighted on the long-term overview, progression documents and on medium term and weekly plans. Planning documents, videos and resources can also be accessed from the Access Art online portal. This curriculum ensures that the children are exposed to a variety of techniques and differing media through a range of experiences including drawing, digital media, painting, printing, textiles, 3-D sculpture and collage.

### **The Early Years Foundation Stage**

We ensure an emphasis on creative and exploratory work in the nursery and reception classes as this is expected as part of the Early Years Foundation Stage curriculum. We relate the creative development of the children to the objectives set out in the Early Learning Goals, which underpin the curriculum planning for children aged three to five.

We provide a rich classroom environment in which we encourage and value creativity. Children experience a wide range of activities that they respond to, using the various senses. The activities that they take part in are imaginative and enjoyable.

We have chosen a selection of relevant units from the Access Art curriculum to compliment other subjects and areas studied within the curriculum for children in reception. Children in reception also join in with the curriculum studied by children in Year 1 where appropriate.

### **Assessment**

Assessment forms part of a continuous teaching and learning process based on work produced throughout the year. Assessment of activities is carried out through observation and discussion with individuals during and at the end of each unit of work. In the Early Years Foundation Stage, children are assessed on an on-going basis using age-related banding and the Early Learning Goals.

### **Resources**

We have a wide range of resources to support the teaching of art and design across the school. A wide range of mark-making implements and specialised equipment is stored centrally in the corridor or resource room.

## **Health and Safety**

Any activities that pose a risk to the wellbeing of children will be subject to a risk assessment.

## **Inclusion**

We provide suitable learning opportunities for all children by matching the challenge of the task to the ability of the child. We achieve this through a range of strategies:

- setting common tasks that are open-ended and can have a variety of responses;
- setting tasks of increasing difficulty where not all children complete all tasks;
- grouping children by ability and setting different tasks for each group;
- providing a range of challenges with different resources;
- using additional adults to support the work of individual children or small groups.

## **Monitoring**

This policy will be monitored every 2 years by school staff and the headteacher.
