

Geography Intent

WOORES PRIMARY & NURSERY SCHOOL

Geography Intent

Our *Geography Curriculum* aims to enthuse children through a high quality curriculum, which fascinates and engages their curiosity about the world around them and the people who inhabit it. We aim to equip children with a deep knowledge of the diverse populations of our planet, the resources they use and the effect that has on the natural and human environment. As children progress through our school, they will become more aware of the interactions between the physical and human processes and of the formation and use of landscapes and environments. The purpose of our *Geography curriculum* is to develop children's geographical knowledge and skills that will provide the framework to help them to explain how the Earth's features are shaped, interconnected and change over time. Where possible, teachers link *Geography* to their termly topics, across the classes, to make them as inspirational and relevant as possible. This cohesive approach will provide an in-depth knowledge for our children.

We will inspire a deeper understanding of the effect of humans on the planet and how they, as individuals, can change the future for the better.
