Nursery Indoor Outdoor Free Flow Policy

Aims:

- To ensure that at all times (except in extreme weather conditions) all the children have access to all indoor and outdoor play areas.

Procedure:

To ensure free flow we:

- Have the door open (using a plastic free-flow curtain).
- Do a risk assessment prior to the children having access.
- Lock the gate to the front of the school and shut the wooden gate onto the playground.
- Ensure the older children are aware of where their coats, hats, gloves and scarves are to help them become more independent.
- Assist the younger children, ensuring they are appropriately dressed for where they are playing.
- Ensure that if we have permission that we apply sun cream when necessary.
